## Read Me First

If you have installed a version of Theorem software previously at R20.X using the msi installer, then it is best to completely uninstall this product from Control Panel > Programs and Features. This will ensure a clean installation.

Before an installation please ensure that you have backed

#### Installation

From R20 the installation process is run from the .msi which can be downloaded. Please double click this file to begin the process after download.

Once started, the Theorem installation will confirm the software to be installed. Please select 'Next'.

This will be followed by the License Agreement. Please read the agreement carefully, check the 'I accept...' box and then select 'Next'.

End-User License Agreement Please read the following license agreement carefully			
CUSTOMER SOFTWARE LICENCE			
NOTICE DO NOT USE THE ENCLOSED, DOWNLOADED OR DELIVERED SOFTWARE (THE " <b>SOFTWARE</b> ") UNTIL YOU HAVE READ AND ACCEPTED ALL THE TERMS OF THIS LICENCE AND WISH TO BECOME THE LICENSEE OF THE SOFTWARE. YOUR NOTIFIED ACCEPTANCE OF OF THE SOFTWARE WILL BE DEFEMED TO BE YOUR ACCEPTANCE OF			
Print Back Next Cancel			

The next step is to declare who the software is to be installed for. There are two possibilities here, the default option is to install for all users or to install for just the user running the installation.

Theorem Solutions CAD_20.1_CA5CVW_WIN.02 Setup		
Installation Scope Choose the installation scope and folder		
Install just for you (user) Theorem Solutions CAD_20.1_CA5CVW_WIN.02 will be installed in a per-user folder and be available just for your user account. You do not need local Administrator privileges.		
Install for all users of this machine Theorem Solutions CAD_20.1_CASCVW_WIN.02 will be installed in a per-machine folder by default and be available for all users. You can change the default installation folder. You must have local Administrator privileges.		
Back Next Cancel		

If the option 'Install just for you (user)' is selected then by default the software will set the install into your local user %TEMP% directory.

If the option 'Install for all users of this machine' is selected then by default the software will set the install into C:\Program Files\Theorem v20.0\

Preorem Solutions CAD_20.1_CA5CVW_WIN.02 Setup

Install Theorem Solutions CAD_20.1_CA5CVW_WIN.02 to:			
C:\Program Files\Theorem v20.1\			
Change			
<ul> <li>Add Start Menu Item</li> <li>Add Desktop Shortcut</li> </ul>			
Back	ext Cancel		

In either case the installation directory can be changed by pressing the 'Change...' button and selecting a new directory.

There are also options to create Start Menu items and Desktop items from both of these pages. These are set to be created by default however simply deselect the options based on your requirement.

Once the installation directory has been set then the translators to be installed must be selected.

When the product installation has finished, this window is presented. Please press 'Finish'.

## Product Configuration

After the product installation has completed the Theorem installation must be configured. After the 'Finish' button is selected the Product Configuration window is launched.

This window allows you to configure the installation directories of your CATIA V5 installation(s), provide the license details and also provide any additional settings that may be required.

To select a configuration option, choose from the panel on the left hand side of the window.

The CATIA panel will display all of the CATIA V5 installation directories for the products installed in the previous steps. This will be pre-populated with an installation path detected on the PC, however, if this is incorrect please use the Folder button to the right hand side and select the correct installation path. If you have other remote CATIA installations you will also need to browse to select the path.

The 'License' panel allows you to set your license server information so that the translator can detect the correct license. The port will be pre-populated with the default port number of 7601. Please add in the Host ID of your license server.

	Define the port and host for the license (e.g. Port: 7601 Host: host_name)
	Port: 7601 Host:
	V OK Cancel

The 'Other' panel allows you to define a location used for temporary file and to include any variables that may be required.

To change the location used for temporary files, use the folder button to the right hand side and select a new directory.

The Variable settings are for advanced users only and should only be used under instruction from Theorem Support. If you need assistance with this please contact support@theorem.com
