|----------|--------------------|
| 1.0      | Initial Release.   |
|          |                    |
|          |                    |
|          |                    |

### **Product Codes**

#### **Product Code Product Description**

| CA5SDB-B1 | CATIA V5 to CATIA ICEM Surf Bi-directional |
|-----------|--|
|           |  |

## **Supported Application Revisions**

The following application revisions have been qualified with this release

| Application | Revision   |
|-------------|--|
| CATIA V5    | CATIA V5R2015(R25), V5R2016(R26), V5R2017(R27), V5R2018(R28) |
| ICEM Surf   | Up to 2017.0   |

## Supporting API's

The following supporting API versions are used

| Application | Revision |
|-------------|----------|
| Surf DB     | 4.12     |

## **Supported Operating Systems**

**Operating System** Qualification Status

The following operating systems have been qualified with this release

| Windows 7 64bit  | Qualified and fully supported                         |
|------------------|---|
| Windows 10 64bit | Qualified and fully supported for ICEM Surf 2016/2017 |

### Distribution Media

Msi packages of the latest release are available from the following download sites.

| Product      | URL for msi download          |
|--------------|-------------------------------|
| Support for  | CA5SDB Product Installer      |
| ALL Versions | Flex License Server Installer |
|              | Theorem UI Installer          |

## New Features / Enhancements

The following new features or enhancements have been introduced with this release. This document also includes fixes

#### Ref ID New Feature / Enhancement Description

| 1 | The product can now be used in conjunction with the Theorem UI. This allows translation configurations to be created and maintained enabling flexible translation capabilities in a simple to use 'drag and drop' interface. This is a separate installation via an msi (see above) |
|---|---|
| 2 | Configurations can be named to suit the type of data and translation. E.g. "CATIA V5 from Company X"  |
| 3 | Named Configurations can now be used on the command line e.g.  cad_run_UI.cmd CA5R26_SurfDB -c "My V5 Surf Config" -i input.part - o output.icem  |
| 4 | The installer now uses MicroSoft Installer. By default this will install the software to C:\Program Files. This can be changed at the point of installation   |
| 5 | FlexLM is now part of a separate installation process and has its own msi   |
| 3 | Treativits now part of a separate installation process and has its own mis  |

#### **Known Limitations and Restrictions**

The following limitations and restrictions have been identified during final testing prior to release

#### **Ref ID** Limitations and Restrictions

Only single configurations can currently be used interactively in ICEM Surf. To choose a new configuration, editing of command files is required

The logic used in some options in the UI is wrongly defined. They options are... Surf DB

- Break Breps
- Write Names
- **2** Fixup

Surf DB → Catia V5

• Read Entity Names

If required, these options should be entered in the General>Advanced area of the Configuration. For further details of these commands and the exact syntax please refer to the user guide

# **Resolved Support Calls**

The following list of Support Calls are resolved with this release

| Support<br>Call ID | Brief Description   |
|--------------------|---|
| CAS-01285          | The teil/molecule (Surf Structure) is now supported in both directions  |
| CAS-03030          | Configurations have been introduced to simplify the conversion syntax. Using configurations for differing data types and data sources allows more flexibility. The use of meaningful names for configurations helps with converting 'non-standard' data |
