## New Features / Enhancements

The following new features or enhancements have been introduced with this release

**Ref ID    New Feature / Enhancement Description**

Ref ID	New Feature / Enhancement Description
1	General improvements to the Read/Write functions.

## Known Limitations and Restrictions

The following limitations and restrictions have been identified during final testing prior to release

**Ref ID    Limitations and Restrictions**

1	<b>Default Output File Location:</b> Since both CAD products use a .prt file extension, when this option is set to “Same location as input file” in the UI, this creates an issue and files may be overwritten. This will be resolved in a future release.
2	<b>Log Files Viewing in UI:</b> When processing NX to Creo translation, the Entity log will appear empty. This will be resolved in a future release.
