CD images of the latest release are available from the following download sites.

Software	Required for	URL for CD image download
Installation Media	Interactive & On-Demand	CAD_22.1_CRENX_WIN.01
Unified Interface	On-Demand only	CAD_22.1_UI_WIN.01
License Server	Interactive & On-Demand	CAD_FLEXLM_11.14_WIN.01

New Features / Enhancements

The following new features or enhancements have been introduced with this release

Creo <> NX

Ref ID	New Feature / Enhancement Description
1	Support for NX 1847
2	Creo Interactive Import & Export to NX now has the ability to launch the Configuration Manager or UI from within Creo.
3	Improvements to Assembly Instance Colours being read from Creo input.
4	Improved XML logging within the Theorem UI
5	When exporting from within the Creo session, the previously used Configuration is now highlighted by default for the next export.

Known Limitations and Restrictions

The following limitations and restrictions have been identified during final testing prior to release

Creo <> NX

Ref ID	Limitations and Restrictions
1	For NX 11 users, the minimum version required is NX 11.0.2.7 MP 10
2	Exporting from within NX is not available due to the use of the .prt file extension by both systems.
3	Interactive Creo Export to NX1847 is not supported. This can be supplied if required.
4	If data is processed with the Instance Arguments and no instances are present, the translation will not complete.
5	There is a limitation with CREO where it won't run our software correctly with CREO 4.0 M070 or above. It is fine at CREO 4.0 M030 and M060, CREO 5.0 and above

Resolved Support Calls

The following list of Support Calls are resolved with this release

Creo <> NX

No new Support Calls logged since previous V21.3 release.

Support Call ID	Brief Description
