## Distribution Media

In addition to the translator software there are also two other related media distributions available. One is for the installation and configuration of the Theorem User Interface. This is designed as a free-standing user interface for the translator allowing the user to navigate the file system and initiate translations either interactively or in batch using standard drag and drop techniques. The second media distribution contains the Theorem License Manager which is installed on the nominated license server(s) and manages the user access to the purchased volume of concurrent Theorem application licenses.

Media for the latest release are available from the following download sites:

## Resolved Support Calls

The following list of Support Calls are resolved with this release.

<b>Support Call ID</b>	<b>Brief Description</b>
<b>TH-215</b>	3rd view now aligns with the capture in CATIA V5. View no longer zooms out to infinity.
<b>TH-257</b>	Dimensional Units on the part attributes in the PDF are now displayed correctly.
<b>TH-290</b>	Attributes are now displayed correctly in the PDF when the output_mbd option is applied. Attributes are now being displayed on the 3DGeom node consequently meaning the attribute fields are populating correctly.
