## PRODUCT RELEASE ANNOUNCEMENT

---

Product Category	<b>VISUALIZE</b>
Product Group	Creo Export for Mevea
Product Release Version	23.3

Document Type	<b>Product Release Announcement</b>
Document Status	Released
Document Revision	1.0
Document Author	Product Manager
Document Issued	11/12/2020

## Contents

History .....	2
Product Codes .....	3
Supported Application Revisions.....	4
Supported Operating Systems.....	4
Distribution Media.....	5
New Features / Enhancements .....	6
Creo Export for Mevea .....	6
Known Limitations and Restrictions .....	7
General .....	7
Resolved Support Calls .....	7

## History

Revision	Update Information
1.0	Initial document release for Version 23.3

## Product Codes

**Product Code**    **Product Description**

Product Code	Product Description
CREMEV-U1	Creo export for Mevea

## Supported Application Revisions

The following application revisions have been qualified with this release

Application	Revision
<b>Creo Parametric</b>	4.0 (M030 – M060 are supported and recommended. Any release below M030 is not recommended. M070 and above are not supported – please see <a href="#">Limitations</a> ) 6.0 7.0

## Supported Operating Systems

The following operating systems have been qualified with this release

Operating System	Qualification Status
<b>Window 10 64bit</b>	Qualified and fully supported

## Distribution Media

CD images of the latest release are available from the following download site. The installation media for the bi-directional product is also the same media when installing a uni-directional variant.

Product Codes	Select link to download CD images
<b>All Product Codes for all supported versions of Creo Parametric</b>	<a href="#">CAD_23.3_CREFBX_WIN.02.msi</a>
<b>Theorem License Manager</b>	<a href="#">CAD_FLEXLM_11.17_WIN.01.msi</a>

Please note that Theorem will provide a Node Locked license which does not require the Theorme License Manager. If you wish to run with a License Server then the License Manager will be required and you will require an updated license – please speak with your Theorem contact for this update.

## New Features / Enhancements

The following new features or enhancements have been introduced with this release

### Creo Export for Mevea

<b>Ref ID</b>	<b>New Feature / Enhancement Description</b>
<b>1</b>	Creo: Export CSYS information to XML based on user selection from assembly structure
<b>2</b>	Creo: Export FBX data based on user selection from assembly structure
<b>3</b>	Creo: Folder Menu for file location to be saved to on export replaces MEVEA_OUT_DIR setting.
<b>4</b>	Updated so material is not defined with negative value.

## Known Limitations and Restrictions

The following limitations and restrictions have been identified during final testing prior to release

### General

**Ref ID      Limitations and Restrictions**

<b>1</b>	Creo 4.0 minor updates M070 and above contain an issue stopping the process from running successfully. It is recommended to avoid these updates.
<b>2</b>	Windchill data processing is not supported at this release.
<b>3</b>	Some issues have been noted when scandanavian characters are defined in the systems %TEMP% variable or the temporary path, defined in the product configuration page. By default Theorem will write temporary files there, currently it is advised that this path variable should be defined containing ASCII only characters
<b>4</b>	The license file path is defined with the configure.cmd tool. Running this tool consecutive times may clear the license path, but if the software has been run once with the license path correctly defined here. The license path will be committed to the registry and the software will function.

## Resolved Support Calls

The following list of Support Calls are resolved with this release

**No outstanding support calls**
