The following operating systems have been qualified with this release

Operating System	Qualification Status
Windows 10	Qualified and fully supported

Distribution Media

CD images of the latest release are available from the following download sites.

Software	URL for CD image download
Installation Media	CAD_26.1_JTC5C_WIN.01_2023.msi CAD_26.1_JTC5C_WIN.01_2024.msi
Unified Interface	CAD_26.1_UI_WIN.02
License Server	CAD_FLEXLM_11.19_WIN.01

New Features / Enhancements

The following new features or enhancements have been introduced with this release

JT <-> Catia Composer

Ref ID	New Feature / Enhancement Description
1	When using this version of the translator with versions of CATIA Composer lower than 2020 a message is displayed when opening the output indicating that the file has been created from a higher release. Tests performed with CATIA Composer 2018 and CAT Composer 2017x have indicated that although the message is displayed the files are able to be accessed successfully. However, there is no guarantee that this will occur in all circumstances. Therefore, it is recommended that the version of CATIA Composer should be version 2021 or higher.
2	Older installations of the Theorem License Server are not compatible with this release of the JT to CATIA Composer code. Therefor the old license server installation must be updated to the latest version shown in the Related Distribution Media section of this document.

Known Limitations and Restrictions

The following limitations and restrictions have been identified during final testing prior to release

General

Ref ID	Limitations and Restrictions

JT <-> Catia Composer

Ref ID	Limitations and Restrictions

Resolved Support Calls

The following list of Support Calls are resolved with this release

JT <-> Catia Composer

No outstanding support calls resolved at this release.
