## New Features / Enhancements

The following new features or enhancements have been introduced with this release

Ref ID	New Feature / Enhancement Description
1	Support for 3DExperience 2023x

## Known Limitations and Restrictions

The following limitations and restrictions have been identified during final testing prior to release

Ref ID	Limitations and Restrictions
--------	------------------------------

1	Unable to use CATIAV6 Read options in a recipe file when translating to Creo View. These options will need to be added to the xcad_creoview_opts.txt file in the Theorem Install.
2	In some cases, with PMI applied, the geometry is not being displayed when the views are selected in Creo View. This is only affecting assemblies which have annotation applied at the part level within the assembly.
3	CATIAV6 Read options added to xcad_creoview_opts.txt file not being applied when translating on the command line. Options will work interactively.

## Resolved Support Calls
