New Features / Enhancements

The following new features or enhancements have been introduced with this release. This document also includes fixes

Ref ID	New Feature / Enhancement Description
--------	---------------------------------------

1	Support for 3DExperience 2022x
2	All references changed from CATIA6 to 3DExperience
3	attach_2D_views_name_only advanced argument created which enables 2D Images in JPEG format to be named the same as the corresponding view in a PDF

Known Limitations and Restrictions

The following limitations and restrictions have been identified during final testing prior to release

Ref ID	Limitations and Restrictions
--------	------------------------------

1	Noshow entities not displayed in the PDF when read NOSHOW entities option is toggled on
2	Both captures and views from 3DExperience displayed as views in the PDF with the read_pmi option applied when translating on the command line. dont_read_views will need to be added to the command in order to translate only the 3DExperience captures

Resolved Support Calls

The following list of Support Calls are resolved with this release

Support Call ID	Brief Description
TH-87	Correct annotation now being displayed in the corresponding views in the PDF
TH-98	Views now displayed in the PDF when construction geometry such as sketches and points are also included in the translation
TH-108	Mark attribute now being displayed in the PDF regardless of whether it is an Integer, String or Boolean
TH-148	PMI that references multiple items now displayed correctly in the PDF when selected
TH-209	Translation no longer taking around 12 minutes to complete. Now taking between 10-15 seconds
